Bowl-O-Drome Will Open in Two Weeks

Torrance's newest recreation center will open two weeks from tomorrow (March 29), when the Schreiber Family Enterprises open the million-dollar Bowl-O-Drome at 220th st., and Western ave.

Already, the modernistic 40-lane bowling establishment is near completion and has earned acceptance and approval from hundreds of Southwest bowlers who have signed up for the opening of regular league competition scheduled to begin April 22.

Owned and operated by Alex Schreiber and his sons, Max and Howard, the Bowl-O-Drome will fill a Torrance need for family recreation. The new center will provide bowling, billiards, food and drink, dancing, a supervised nursery and the latest innovation in its industry: a "free" kiddieland.

"Kiddieland will be a virtual paradise for young children," the Schreibers promise. "Parents will be able to relax and play in comfort while their children enjoy themselves in complete safety."

An enclosed, outdoor area called "Kiddieland," will include a small ferris wheel, merry-go-round, pony rides, elephant slides, swings, see-saws and sand boxes. A complete playground and it's all for free!

Bowl-O-Drome covers a four-acre area including free park-

ing for 350 cars. The one-floor building, covering 40,000 square feet, has been under construction since August 13, 1956.

Schreiber Family Enterprises previously built and operated Paradise bowl in Westchester and Victory bowling lanes in Van Nuys. The organization plans soon to construct another 32-lane bowling establishment at Lakewood and Firestone.

Bowl-O-Drome will operate on a round-the-clock schedule with more than 60 full-time employees available to accommodate the public with the finest in service, equipment and facilities.

Harvey Plant Is Paramount Movie Site

Paramount Pictures has selected the Harvey Aluminum plant in Torrance as a major location site for a forthcoming feature movie. The film is being directed by James Cagney and produced by A. C. Lyles.

Production schedule calls for shooting at Harvey around the end of March. Company facilities to be incorporated into background scenes include the lingo casting plant, heavy extrusion presses, vertical heat-treat furnaces, forging presses, and the pig aluminum storage area.

Two Attend Conference

Melvin E. Sparks, Veterans Employment representative, and Sam Kronberger, Veterans Employment committee member, attended an all-day conference on veterans' problems in Los Angeles on Thursday, March 7, according to Mrs. Winona Ellis, manager of the Torrance California State Employment service.

Watchful eyes guard your voice when you telephone

Every time you make a phone call, a vast network of equipment speeds your voice to its destination. But a failure anywhere along the line could interrupt your service. So telephone people have worked out many ways to head off possible cases of trouble. For instance, in the maintenance center where Mike Sturtevant (above, left) and Stan

Jansen work there's a new kind of line tester that checks the condition of thousands of lines an hour. It shows how well yours and others are working. In addition, telephone central offices have automatic trouble recorders that keep tabs on dial switching equipment. These recorders reveal trouble before it can interrupt routing of your calls.

Patrolling cross-country lines is another way we keep an eye on your service. And on microwave radio-relay routes and many cables, built-in alarms sound off automatically back in a control center

whenever trouble threatens. In all these ways, and many others, telephone people safeguard your calls round the clock. It's part of the dependable phone service you've come to count on.

Working together
to serve you better ...
